# 2022/07/14

- Anukruthi requested if she could make the datasets herself, as such, I have scheduled a meeting with her tomorrow at 2 pm to show her how to use the simulation bench's data logging features.

- What's left to do is:
    - Make some datasets using the synchronous data logging pipeline for Naireet, about 10-20 should do

    - Make a slideshow for the future presentation for the ACE visit

- An urgent matter arose. The video call I scheduled with Amal to help resolve the infotainment unit connection was postponed as my mother was experiencing emergency health complications. She had trouble breathing and had extremely high blood pressure readings. As nobody else was home and I was the nearest, I had to go home and take her to the doctors. The meeting is postponed to tomorrow at 5 pm.
